Volume XXXXI Number 1

Come Out and Enjoy An Evening of John James Audubon Art and Support the Clearwater Audubon Society's Education Fund

CLEARWATER - Clearwater Audubon is privileged to partner with Syd Entel Gallery in Safety Harbor for a first time showing of re-created John James Audubon original prints. The show will run from November 11 through December 1, 2006. Prints are for sale and a percentage of the sale will go to the Clearwater Audubon Society.

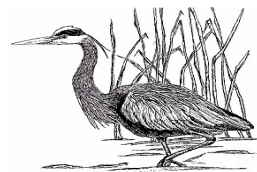

John James Audubon's "The Birds of America" *Audubon Centennial Edition* is published in association with the National Audubon Society's 100th Anniversary. The prints of this edition are first generation facsimiles produced to the same image and paper size as the original *Havell edition*. The edition includes all 435 images from "The Birds of America" original edition. The presentation of John James Audubon's "The Birds of America" collection represents Audubon's "quest to depict every bird in America" during the 1800s.

Clearwater Audubon members and their guests are invited to a special showing on Friday November 17, 2006 from 6:00 to 8:00 p.m. Members and guests attending the Friday showing will be treated with hors d'oeuvres, wine and refreshments while they enjoy their "ramble" through the gallery.

For the Friday showing, the Clearwater Audubon Society is asking for a donation of \$20 per person or \$30 per couple at the door. Advance tickets can be purchased. Checks should be made out to the Clearwater Audubon Society and mailed to Syd Entel Galleries, 347 Main Street, Safety Harbor Florida, 34695. According to event organizers, Clearwater Audubon will receive 100% of the entrance fees for Friday evening and will use the donations for the education fund.

President Paul Trunk notes that the event is the Clearwater Audubon Society's major fund-raiser of the year. "This is a great opportunity to come out to purchase some of John James Audubon's most memorable prints and at the same time support the educational programs sponsored by the Clearwater Audubon Society,"

For more information contact Barbara Carmen at 727.776.2336 or Debbie Trunk at 727.447.4785.

Greetings from WingBeat's New Editor

As the new editor of WingBeat, I would like to take a minute and introduce myself.

Compared to many of you, I am a newcomer to the world of conservation, birding and the Audubon mission. A couple of years ago I was introduced to nature photography. I soon learned that making images of birds in their habitats was both challenging and personally rewarding.

In an effort to make better pictures I learned that I needed to understand birds at many levels. As you would expect my investigation into the wonderful world of birds and their habitats led me to the Clearwater Audubon Society.

I volunteered to work on WingBeat because it is a valuable tool designed to keep the membership informed on what is happening in the Clearwater Audubon Society.

Please contribute to our newsletter with your articles, events and ideas. I can be reached at buddei38@msn.com or 727.224.7869.

In closing I want to thank Aydelette Kelsey, Wingbeat's past editor, for taking me under her wing and editing such a great newsletter.

Mac McMullen

Clearwater Audubon Society Board Votes To Oppose County's Proposal To Abolish Floodplain Density Limitation

Clearwater, Fl, July 31, 2006 - Officers of the Clearwater Audubon Society voted to oppose a Pinellas County proposal to abolish flood plain density limitations in a board meeting held in July.

In a unanimous vote, the board approved language asking members of the Clearwater Audubon Society to contact Board of County Commissioners and voice their disapproval.

Pinellas County is currently considering a proposal to allow more development in the 100-year floodplain by removing the density limitation (currently 5 units per acre) contained in the County's comprehensive plan.

The Clearwater Audubon Society believes more floodplain development is undesirable because it:

1) interferes with the protection, restoration and management of floodplains which serve the vital function of storing floodwaters, thereby making flooding worse;

2) places more people and property in the path of hurricanes and dangerous storms, exacerbating the shelter shortage and making evacuation more difficult;

3) creates additional strain on city services, including water, sewer, and roads, that are already overburdened.

The board maintains that the County's comprehensive plan is intended to manage growth for the benefit of all residents, and should not be changed every time a developer proposes a new project. In the wake of Hurricane Katrina's destruction, it is particularly absurd to allow more building in the areas most vulnerable to storms, putting people and property at greater risk.

Contact your Board of County Commissioner today.

Clearwater Audubon Society Opposes New Building Within the Brooker Creek Preserve

Clearwater, Fl, August 28, 2006 - The Clearwater Audubon Society Board of Directors voted to oppose any new building within the Brooker Creek Preserve.

The Preserve, comprised of more than 8000 acres in northeast Pinellas, is one of the few large tracts of green space remaining in Pinellas County. It should be preserved for future generations of residents and not sacrificed to development.

Recent county government actions suggest that government officials view the Preserve as vacant land to be used for a number of purposes other than conservation. For example, the county has proposed projects inside the Preserve including reactivation of long-capped wells, the clearing of acreage for athletic fields, water utility projects, and placement of water storage tanks, among others. Certain parts of the Preserve have already been built upon.

The Clearwater Audubon Society believes that conservation and protection of wildlife should be important goals of county government. The County should affirm its commitment to these goals by protecting the Preserve from development indefinitely. Please contact your commissioners today and tell them:

NO MORE BUILDING IN THE BROOKER CREEK PRESERVE!

At **Nature's Focus** 10% of your cash purchases and 5% of credit card purchases will be donated to Clearwater Audubon if you identify yourself as a member. Sale or discounted items may not qualify. Store is located at the Brooker Creek Preserve. Call for hours or other information: 727.453.6959

Clearwater Audubon Society Member To Attend The Georgia Coastal Birding Festival

The Georgia Coastal Birding Festival is scheduled for Friday October 13th through Sunday, October 15th. Board member Jane Williams reports she plans on attending. According to Jane there are wonderful events scheduled including opportunities to tour normally non-accessible islands like Ossabow, Blackbeard, Wassaw, Little Tybee, and the privately owned resort Little St. Simons.

“Touring the islands means no creature comforts like bathrooms, picnic shelters, or benches. Plus you are likely to be slogging through mud and standing water and there is no shelter if it rains, last year it poured and hurricane Rita caused a washover on many of the islands. But still, these are popular events,” Jane said.

Pre-registration began August 22nd online at www.coastalgeorgiabirding.org.

Anyone interested in attending the festival with Jane can reach her 727.447-7394.

Reports from Clearwater Audubon Scholarship Recipients Maine Camps, Summer 2006

Remember our Pot Luck on Monday, November 6, 2006 at 6: 00 p.m. at Moccasin Lake Park. Please bring a dish to serve eight, utensils and a plate. Come to meet and hear the presentations of our campers.

For members that can't attend the Pot Luck, WingBeat is publishing observations made by our campers.

Camper Brittany Lyp writes:

Waking up to tender dreary fog in the distance as the sun peeks out of the horizon with warbles singing in the distance and the boisterous engines of Maine's Lobster boats is where I called home for a week- Hog Island, Maine.

We started out our week going to Medomak Trail and Village where legendary birder Roger Troy Peterson had once walked and observed bird life, walking in his footsteps was incredible.

One of my favorites trips included Eastern Egg Rock, seeing the puffins and learning about the dedication, commitment and passion of Stephen W. Kress and his colleagues waiting in long anticipation for the first sighting of puffins back at Eastern Egg Rock .

The trip to Acadia National Park was my first trip to a national park. We had a large extent of bird sights, breathtaking overviews while watching the clear white water crashing on the rocks like thunder beneath your feet.

We went to various birding spots including mountainsides, seawall beaches, marshes, and a lighthouse to look for diverse types of birds. Our final total of bird sightings was 103 different birds including herons, cormorants, eiders, woodpeckers, osprey, hawks, owls, swallow, chickadee, wren, warblers, finch, bald eagles, sparrow, sandpipers, storm-petrel, and loon just to name a few.

Closing off the evenings were guest speakers who motivated me the most as I saw how much they loved their job and/or hobbies. I am truly blessed and grateful having had this opportunity to attend this camp, it has been a magnificent and astonishing experience and one I will always remember, this is one camp everyone would benefit from.

Thank You.

Camper Mark Athanason writes:

My trip to Maine was an experience that I will always remember. I have always lived in Florida and the bird walks that I have been on were all at Moccasin Lake Park. Many of the birds we see in the park are the same as the ones I see in my back yard. But in Maine, every bird we saw was new to me.

As a group we saw at least 50 different types of birds. At each new location we visited, we saw different species of birds. And the locations themselves varied from marshes to being on the top of Cadillac Mountain.

The climate was way different than what I am used to, especially in the summer, which made it all the more interesting. It was very cool on some of the mornings and evenings. It is very true about what they say about the weather up there; "if you don't like the weather now, just wait a few minutes".

Please see REPORTS PAGE 5

REPORTS from page 4

Every place we went to was very scenic. Being from flat Florida, it is always exciting to see big hills and mountains. And also being used to white sandy beaches, I had never seen rocky beaches and shorelines like the ones in Maine. The island we stayed on was where, for the first time, I saw a humming bird. I also experienced the act of banding, and at the same time saw a wild bird up close. And of course, we saw the Atlantic Puffins, which had to be the highlight of the trip.

And it wasn't just the outdoors that was a great experience; it was also the people I met there, too. Each of the instructors had a very interesting background and was very willing to share their knowledge. And on top of everything, the food was great, too, especially the lobster dinner. The people you will meet, the things you will see, and the experiences you will have will just astound you. It sure did for me.

I want to thank everyone who helped send me to this camp. It was a wonderful experience that I will never forget.

Thank you all again and I will see you in November to tell you all about it.

Camper Caroline Salsbury writes:

Sweet pine-scented air, the lapping of waves against the granite rocks and the calls of the seagulls, loons and osprey that soared overhead are some of the vivid memories I cherish.

With generous help from The Clearwater Audubon Society, my incredible week spent on Hog Island in Muscongus Sound began Sunday, July 2nd, 2006.

Upon arrival at the Todd Audubon Sanctuary, we were ferried across to the island and moved into the old chandlery at the water's edge. Fifteen adults and fourteen teenagers arrived with an eagerness to learn as much as possible at the oldest continuously operating adult environmental education camp in the US.

Never had I seen such a competent and engaged group of people who were so environmentally conscious! Most were active birders, amateur photographers, geologists and all willing and eager to see nature up close. Our days were filled with sightings of wren, warblers, gold finches and cardinals. We hiked, explored tidal pools and pressed algae.

We were instructed by world traveling naturalists who had been studying condors, raptors, loons, whales, penguins, puffins, butterflies and insects. We traveled on The Puffin IV past the eagle and osprey nests that now abound along the coast.

We circled Eastern Egg Rock where scientists have restored the puffins after a 100 year absence. They are now joined by terns, guillemots and a variety of gulls. We learned that this success story with sea birds has been replicated with other endangered birds around the world.

After a week on Hog Island to study the natural history of the Maine coast, I came away inspired, renewed and eager to spread the Audubon's conservation message.

Camper Rachel Franklin writes:

One of the most influential experiences of my professional career as an environmental educator was my trip to Hog Island, Maine, where I attended the week-long Audubon Coastal Maine Ecology camp.

It was a short jaunt on a boat over to Hog Island. How exciting to finally get to be the camper and not the camp instructor. Everything from receiving my name-tag, to seeing my room for the first time, to meeting my bunkmates, was such a thrill.

The island itself was amazing I made a point to allow myself time after class to explore the entire perimeter on my own. There were things I had never seen like lobster shells brought up onto the shore by minks, a harbor seal's head bobbing up in down in Muscongus Bay, the classic "pea soup" fog rolling onshore off of the water.

I was fortunate enough to be attending the camp during its 70th year anniversary. What a privilege and an honor to take part in something that so many people have committed such love and passion to. That love and passion really showed in the camp, it's staff, and it's instructors.

Please see REPORTS PAGE 6

REPORTS from page 5

The best part of my trip was all of the wonderful people I met, both staff and campers. To be surrounded by so many like-minded people was empowering and inspirational. I've made life long friends that I will continue to contact throughout my life and career. I am truly grateful to Audubon for allowing me to take part in such a worthwhile and important learning experience.

For more information on Clearwater Audubon Society Camp Scholarships contact Jackie Williams at 727.585-3587.

Keys Birding and Wildlife Festival

Set for Sept. 29-Oct. 1

By Bob Serata

Florida Keys News Bureau

FLORIDA KEYS — Water fowl and falcons are to be the star attractions at the seventh annual Florida Keys Birding and Wildlife Festival, set for Friday through Sunday, Sept. 29-Oct. 1.

The annual festival gives visitors and locals a chance to get acquainted with some of the unique birds and wildlife native to the Keys. Some special guests also are featured — thousands of peregrine falcons that move through the Keys on their southerly migration every autumn.

The festival is to begin Friday, Sept. 29, at the Marathon Garden Club, mile marker (MM) 50 bayside in Marathon, with a presentation about short-tailed hawks and white crown pigeons.

Saturday's schedule is to be filled with field trips, kayaking and educational programs. Curry Hammock State Park, MM 56.2 oceanside, is to host an environmental fair with eco-savvy vendors and organizations offering advice, information and products.

Special programs on Saturday, to be presented by a variety of experts and enthusiasts, include "Planting a Wildlife-Friendly Yard," "Good Bug Bad Bug," "Nest Box Cavity Boxes for Birds" and "Invasive Exotics & How to Control Them."

Children's activities are scheduled all day so the whole family can have fun learning about the birds and wildlife of the Keys.

Events for birders and others eager to discover the Keys' natural world are to continue Sunday.

The official counts are held from Sept. 15 through Nov. 13 at Curry Hammock by scientists and volunteers from Hawk-Watch International and the Florida Audubon Society. A special thrill for many birders and non-birders alike is the oppor-

tunity to see what many consider the largest peregrine falcon migration in the world.

On average, about 15,000 raptors are counted during the project.

For more information on the Florida Keys Birding and Wildlife Festival, call (305) 872-0774. To learn more about the Florida Keys Raptor Migration Project, e-mail clott@abcbirds.org.

The festival coincides with the annual Florida Keys Raptor Migration Project, a research program that counts falcons and hawks as the raptors migrate through the Florida Keys.

National Audubon Society and National Arbor Day Foundation Continue Rebuilding Efforts by Giving Trees to Katrina Victims

Moss Point, MS, August 17, 2006 - Launched last year by National Audubon Society and The National Arbor Day Foundation, the Katrina Tree Recovery Campaign has distributed over 25,000 free trees to residents of coastal Mississippi and southeastern - and thousands more are on the way. As the prime fall planting season approaches, the Arbor Day Foundation will deliver at least 18,000 additional trees for a second tree giveaway program.

Thousands more trees are needed to begin to replace what was lost.

In recognition of their commitment, the Arbor Day Foundation will provide each donor of \$10 or more a free membership including a subscription to the Foundation's bimonthly publication, Arbor Day. For every \$10 contribution to the Katrina Tree Recovery Campaign, the Arbor Day Foundation will donate 10 trees to volunteer tree planters in Louisiana and Mississippi.

Audubon Mississippi's collaboration with The National Arbor Day Foundation is part of its overall initiative to promote the recovery of habitat for birds and other wildlife in areas stricken by Hurricane Katrina. More information about the project, Operation Backyard Recovery, can be found at <http://www.msaudubon.org/>.

2006 - 2007 Clearwater Audubon Programs

Clearwater Audubon Society programs are intended to be both educational and entertaining. Anyone is welcome to attend. Programs begin at 7:30 PM in the Education Center at Moccasin Lake Nature Park. For more information call Program Chairperson, Marge Rowe at 781-0745.

OCT. 2, 2006 Whooping Cranes: A Reintroduction - Sarah Palmisano, Refuge Operations Specialist, Chassahowitzka National Wildlife Refuge Complex, reviews the whooping crane reintroduction project and describes the three North American populations, especially details of the Wisconsin/Florida migratory population. She will cover the Refuge's role in the recovery of this highly endangered species and the process of teaching the birds how to be whooping cranes and their migration route south. Plan to attend the December flyover as the cranes follow the ultralight planes to arrive at Chassahowitzka.

NOV. 6, 2006 (starting at 6PM) Welcome Back Pot Luck Dinner & Presenters from Audubon Ecology Camp -Please bring a dish to serve six and your own table service. Teachers and students who received 2005 Clearwater Audubon scholarships to Maine Audubon Ecology Camp on Hog Island will describe their adventures.

DEC 6, 2006 Ecological Research along Florida's Gulf Coast. - Steve Harper, Research Director for the Pinellas County Environmental Lands Division describes the challenges associated with conducting scientific studies in our diverse local ecosystems and how insight and understanding gained from research can contribute towards improved conservation and stewardship of unique natural areas.

JAN. 8, 2007 Birding at the Speed of Drift - Sandy Huff, internationally award-winning outdoor writer asks: Tired of hiking in the hot sun to look at birds? Try sitting down, usually in the shade, and watching birds in their native habitat. At the same time, you're viewing, and being propelled by, Florida's gorgeous rivers. Huff is the author of "Paddler's Guide to the Sunshine State," plus over 1000 articles in magazines and newspapers. Come join her for an illustrated look at Florida's many river, stream, and coastline birds you can see from a canoe or kayak. You'll even get some paddling tips.

FEB. 5, 2007 Ecology of Florida Grasshopper Sparrows at Kissimmee Prairie Preserve - Marianne Korosy, Ph.D. Student in Conservation Biology at UCF, presents new research using radio tracking to learn about survival of juvenile and adult Florida Grasshopper Sparrows during fall and winter months when they share the dry prairie with migrant Henslow's, LeConte's, Swamp and Savannah sparrows.

MAR. 5, 2007 John Moran's Journal of Light: A Photographer's Search for the Soul of Florida -John Moran travels the Sunshine State with his cameras, seeking his vision of natural Florida as it must have appeared to Ponce de Leon and other early strangers in paradise. Moran's work celebrates the magic of a unique landscape born of water and blessed with beauty beyond measure. Moran's remarkable Journal of Light speaking programs, based on his book and touring museum exhibit of the same title, highlight a 20-year odyssey to discover the soul of one of the most photographed states in the country, and feature his striking photographs of the alligators, beaches, birds, rivers, springs, palms, turtles and flowers that make Florida the amazing place we call home.

APR. 2, 2007 Florida Audubon's EagleWatch Program - Lynda White, Audubon EagleWatch Coordinator explains how a rebounding bald eagle population and unparalleled growth presents challenges in Florida to protect eagles while allowing for development. Sound conservation practices, cooperation from developers and the Audubon EagleWatch program are all key to ensuring the continued successful recovery of the bald eagle from near extinction. Attend this presentation to learn more about these magnificent birds and ways you can help in the effort to preserve and protect our national symbol.

MAY 7, 2007 - Clearwater Marine Aquarium speakers will describe this facility, which is dedicated to the rescue, rehabilitation and release of animals and birds. The aquarium provides a home for many animals rescued and rehabilitated by our stranding response team -- one of the nation's most successful. Although many of these injured or sick animals can eventually be released, some have become permanent aquarium residents due to the extent of their injuries or permanent disabilities, including Atlantic bottlenose dolphins, several species of sea turtle, North American river otters, brown pelicans, raccoons, opossums, and others.

October & November 2006 Calendar

OCT. 2, 2006 Whooping Cranes: A Reintroduction - National Wildlife Refuge Complex, reviews the whooping crane reintroduction project and describes the three North American populations, especially details of the Wisconsin/Florida migratory population. She will cover the Refuge's role in the recovery of this highly endangered species and the process of teaching the birds how to be whooping cranes and their migration route south. Plan to attend the December flyover as the cranes follow the ultralight planes to arrive at Chassahowitzka. *(Clearwater Audubon Society programs are intended to be both educational and entertaining. Anyone is welcome to attend. Programs begin at 7:30 PM in the Education Center at Moccasin Lake Nature Park. For more information call Program Chairperson, Marge Rowe at 781-0745.)*

Saturday, 10/7/06, 7:30AM – Clearwater Audubon Field Trip Honeymoon Island: wading, water & shore birds plus migratory songbirds & raptors. 2-3 mile walk on sand trails & some pavement. Meet behind McDonalds at Alt19 & Curlew Road. *Jackie Williams 727-585-3587.*

Saturday, 10/7/06, 3:00PM– Photography Program: Join Aydelette Kelsey at the West Pasco Audubon Meeting at the Starkey Ed Building in New Port Richey. For details call **Aydelette at 727-712-1770.**

Saturday, 10/14/06, 6:30AM – Clearwater Audubon Field Trip Circle-B-Bar Ranch: eagles & other raptors, oak canopy songbirds, water birds & alligators at former cattle ranch in xeric oak habitat & on the shores of Lake Hancock. 3.5 miles walk on sand trails. Tri-City Mall. *Lynn Sumerson 727-596-8822.*

Saturday, 10/21/06, 7:30AM – Clearwater Audubon Field Trip Ft. DeSoto County Park: migratory songbirds, raptors, water & shore birds. Causeway & shoreline drive plus 1-2 mile walk at mouth of Tampa Bay. Tri-City Mall. Bill Stokes leader. *Lynn Sumerson 727-596-8822 or Mike MacDonald 727-538-8688.*

LONG DAY TRIP: Saturday, 10/28/06, 6AM – Clearwater Audubon Field Trip Emerald Marsh: water edge songbirds, raptors, waders & glossy Ibis along 8 miles of freshwater impoundments & short grass trail walk northeast of Leesburg. Countryside Shopping Town. *Mike MacDonald 727-538-8688.*

Saturday, 11/4/06, 8AM – Clearwater Audubon Field Trip Moccasin Lake Nature Park: resident & migratory songbirds, water birds & raptors in oak & xeric hammocks. Easy .75 mile walk on shell trail & boardwalks. *Joan Brigham 727-447-9367.*

NOV. 6, 2006 (starting at 6PM) Welcome Back Pot Luck Dinner & Presenters from Audubon Ecology Camp -Please bring a dish to serve six and your own table service. Teachers and students who received 2005 Clearwater Audubon scholarships to Maine Audubon Ecology Camp on Hog Island will describe their adventures. *(Clearwater Audubon Society programs are intended to be both educational and entertaining. Anyone is welcome to attend. Programs begin at 7:30 PM in the Education Center at Moccasin Lake Nature Park. For more information call Program Chairperson, Marge Rowe at 781-0745.)*

Saturday, 11/11/06, 8AM – Clearwater Audubon Field Trip Fred Howard & John Anderson Parks: migratory songbirds, raptors, water & shore birds along causeway & shoreline drive plus 1-2 mile trails. Meet in Fred Howard Park. *Merle Hubbard 727-939-1549.*

Saturday, 11/18/06, 8AM – Clearwater Audubon Field Trip Brooker Creek Preserve: resident & migratory songbirds, raptors, critters, wildflowers & more. Moderately difficult walk on packed trails. Meet at education center. *Jim McGinty 727-453-6906 or Ken Rowe 727-781-0745.*

Saturday, 11/25/06, 8AM – Clearwater Audubon Field Trip John Chesnut Park: resident & migratory songbirds, raptors & more. Easy walk on packed trails & pavement. Meet at parking lot near boat launch. *Ellen Pfau 727-786-3716.*

FIELD TRIP CORRECTIONS

Sunday, 12/17/06, all day – Annual Christmas Bird Count: volunteers needed. *Ken Rowe 727-781-0745.*

MULTI-DAY TRIP: Saturday, 1/13/07, 6:00 AM, to Monday, 1/15/07, 4PM - Everglades National Park. *Ken Rowe, 727-781-0745*

Saturday, 1/20/07, 7:30AM – Lake Rogers Park: songbirds & water birds along 2.5 mile sand trail circling Lake Rogers plus Al Lopez Park [time permitting]. Countryside Shopping Town. *Mike MacDonald 727-538-8688.*
